DETAILED ACTION

1. This office action is in response to applicants' communication filed on November 28, 2006. Replacement drawings filed therein are accepted by the examiner. Amendments to claims 1-17, 19-22, 30, 32, and 34-38 and cancellation of claims 39-66, 68-88, and 90-94 have been entered. Applicants assert that IDS were submitted on May 2, 2001 and considered by the examiner. However the office has no record of IDS submitted by the applicants on May 2, 2001. Applicants are requested to submit their file copy of the IDS along the proof of submission. Claims 1-38 are currently pending and have been examined. The rejections and response to arguments are stated below.

Claim Rejections - 35 USC § 101

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 1-38 are rejected because the claimed invention is directed to non-statutory subject matter.

Claims 1-38, the disclosed invention is inoperative and therefore lacks utility.

Claims 1-38 merely recite elements of an apparatus or a system ("means for" corresponds to software program elements and not tangible hardware components) without showing any ability to realize functionality of the recited elements (i.e. functional descriptive material per se) and therefore is rendered inoperative lacking any utility.

Art Unit: 3692

Similarly the claimed modules are interpreted as software. Note that a computer (or software program) code cannot by itself perform the underlying function until it is loaded on some computer readable memory and accessed by the computer (or a processor).

Functional descriptive material, per se, is not statutory. This is exemplified in *In re Warmerdam* 31 USPQ2d 1754, where the rejection of a claim to a disembodied data structure was affirmed. Thus a claim to a data structure, per se, or other functional descriptive material, including computer programs, per se, is not patent eligible subject matter.

Response to Arguments

4. Amending the independent claim 1 to recite that the aggregated earnings estimates performance data may be viewed via a graphical user interface does not overcome the operability requirement under 35 USC 101. The claimed invention is interpreted as a collection of software elements. The graphical user interface is also not positively recited or claimed as a part of the system. Applicant's arguments amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims disclose operability and the corresponding utility.

With regard to arguments against the 35 USC 103 rejections, the applicant's arguments are persuasive and hence these rejections have been withdrawn.

Applicant's other arguments with respect to pending claims have been considered but are not persuasive.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
